PROJECTS

Online Medicine Ordering system (Mini project):

The Online Medicine Ordering System offers secure remote purchasing of medicines and healthcare products. It provides convenient browsing, ordering, and delivery tracking, enhancing accessibility to essential healthcare services.

College Website Revamp

Contributed to a live college website by implementing real-time updates, UI improvements, and content management using HTML, CSS, JS, Bootstrap, PHP, and WordPress.

Report Analysis

Built a full-stack web app using ReactJS, NestJS, and SQL to analyze and visualize 50,000+ lines of real JNTU student data. Used across 3 colleges to convert raw academic data into clear charts and graphs for easy interpretation and informed decision-making.

Educate All - (Training Use-case):

A portal for volunteers/teachers (educated housewives, retired persons, or similar profiles) to offer free online lessons to orphanage students. Organizers help students find teachers for needed subjects and schedule online lessons. The progress and status of these lessons are monitored by the organizers.
